Business model and growth strategy

... and a risk spectrum that we need to take action on

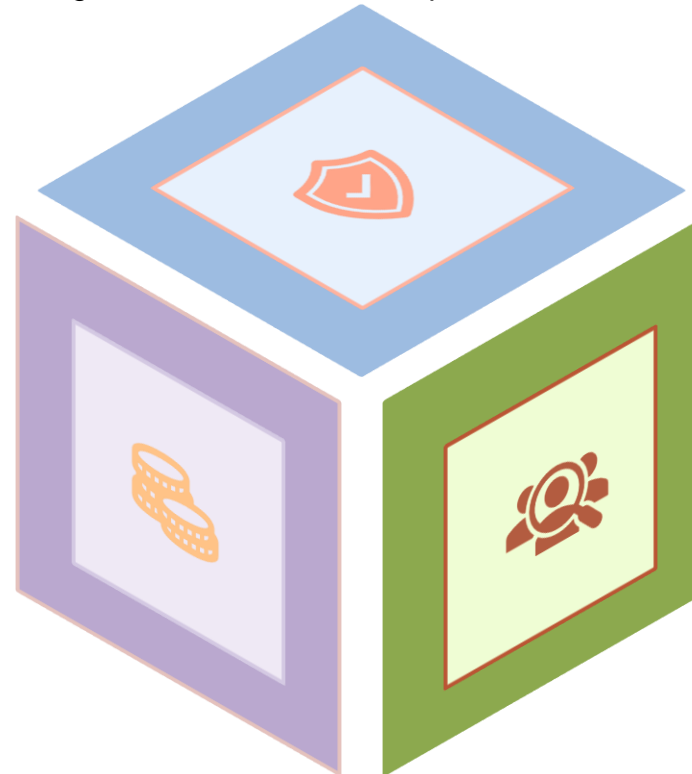

- We will decide on where to grow based on three dimensions:

Market Potential

- Market potential is assessed by size, growth potential and profitability of line of businesses.
- Most profitable products with highest growth is defined as "sweet spots" and profitable products with yet relatively lower growth is defined as "deep dive areas".

Return on Target Capital

- Target line of businesses and customers with sufficient return on capital.

Customer

- Consider total customer value rather than pure technical profitability of a single product / LoB.

Our Purpose

For a sustainable life, with new generation solutions; we protect the valuable one together.

Our Strategic Choices

Establish a **customer value based** business model

Revisit **corporate UW in a tightened reinsurance** market

Enhance **distribution channel potential**

Accelerate **‘profitable growth’** in selected lines which contribute to CAR

Develop **new growth engines**

How will we do it?

Total customer value rather than pure technical profitability for a single product

Identify valuable customers and create a business model to attract, develop and retain them

Optimize the reinsurance structure and establish a flexible framework

Diversify sales service model based on customer and agency segmentation

Focus on automotive agencies

Untap bancassurance potential

Further invest in digital and analytical capabilities (e.g. APIs, chatbots, digital assets, next best offers, lead generation)

Diversify channel portfolio to reduce dependencies (e.g. global brokers vs mid-size brokers)

Focus on segments and LoBs that consume less capital and support profitable growth

Establish B2B2C partnerships, prioritizing Sabanci synergies

Capabilities we will be known for

People

Technology (Data & AI)

Sustainability

Motor

Motor Third Party Liability (MTPL):

Mandatory insurance that covers damages by the insured vehicle to others, ensuring protection within defined limits.

Motor Own Damage (MoD):

Optional coverage, often referred to as CASCO, safeguarding against damages to the insured vehicle. It encompasses diverse perils, ranging from fires, natural disasters, and theft, to potential losses of personal and professional belongings.

Non-Motor

Fire: Specialized property insurance that addresses damages and losses resulting from fire incidents.

Engineering: Tailored coverage providing financial protection against risks encountered by construction projects, machinery, and equipment.

Liability: A safeguard against potential legal liabilities, defending the insured against lawsuits and related claims within the policy's purview.

Marine: Transit insurance, ensuring coverage for the insured's property while being transported between locations, irrespective of the mode of transport.

General Losses: Comprehensive coverage mitigating the risks associated with everyday life.

Health

Aksağlık Insurance: Offers privileges according to your needs with more than 4000 contracted institutional options and different policy plans to get to the health care solutions “just for you.”

Critical Illness Insurance: Should any of the 13 dangerous conditions and illnesses covered under the scope of “Hayata Devam!” Insurance occur, indemnities starting from TL 50,000 are available.

Health Insurance for Foreigners: In accordance with the law, Health Insurance for Foreigners, a must for non-citizens who come to Turkey to obtain a residency permit, is available at Aksigorta.

ESG - Charting a Sustainable Tomorrow

Factors driving insurance penetration in Turkey

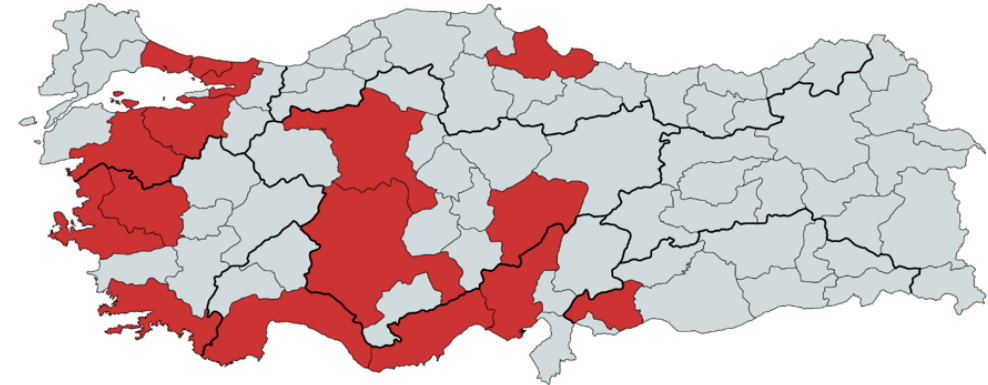

Different premium segments are driven by three different factors. Insurance penetration also depends on economic development.

Premium production by segment and factors driving penetration

Note: As of 30.06.2024

Premium production is affected by socio-economic status of cities and per capita income

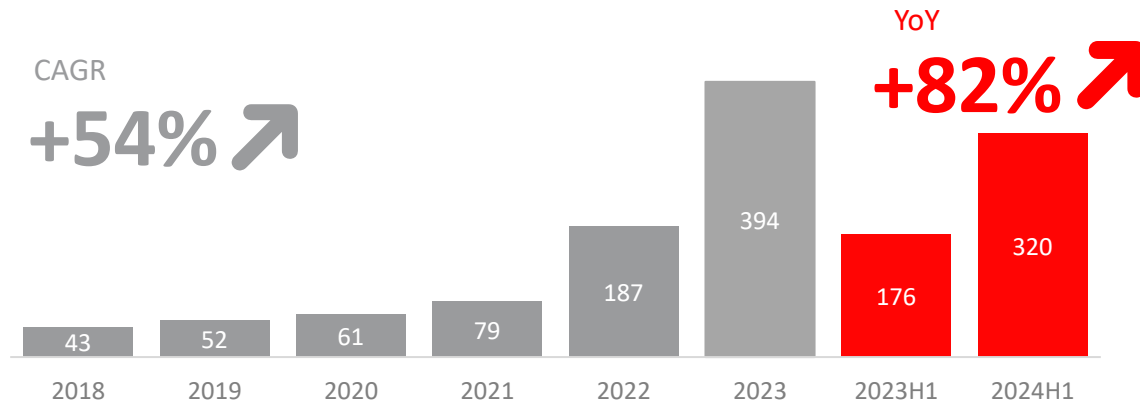

Top 15 cities generate 75% of total premium production.

Higher per capita income leads to higher premium generation. Top 15 cities in premium production have higher per capital income levels compared to the rest.

Insurance is the core business in agencies while it is a part of financial services in banks

Market GWP* (TL bn)

Key growth assumptions

Distribution Channels Market Share:

- The agency channel dominates the market, accounting for 57% of the total, followed by corporate and bank channels at 30%** and 13%**, respectively.

Motor Products Distribution through Agency Channel:

- A significant 78% of motor insurance products (both MTPL and MOD) are distributed through the agency channel. Within the agency channel's portfolio, motor products represent 59%**.

Channel Performance:

- The agency channel has exhibited exceptional growth in motor product sales, outpacing other channels.
- Conversely, the bank channel has experienced a deceleration, largely influenced by a reduced credit appetite and a global trend of customers transitioning from in-branch to digital services, particularly in the retail segments.

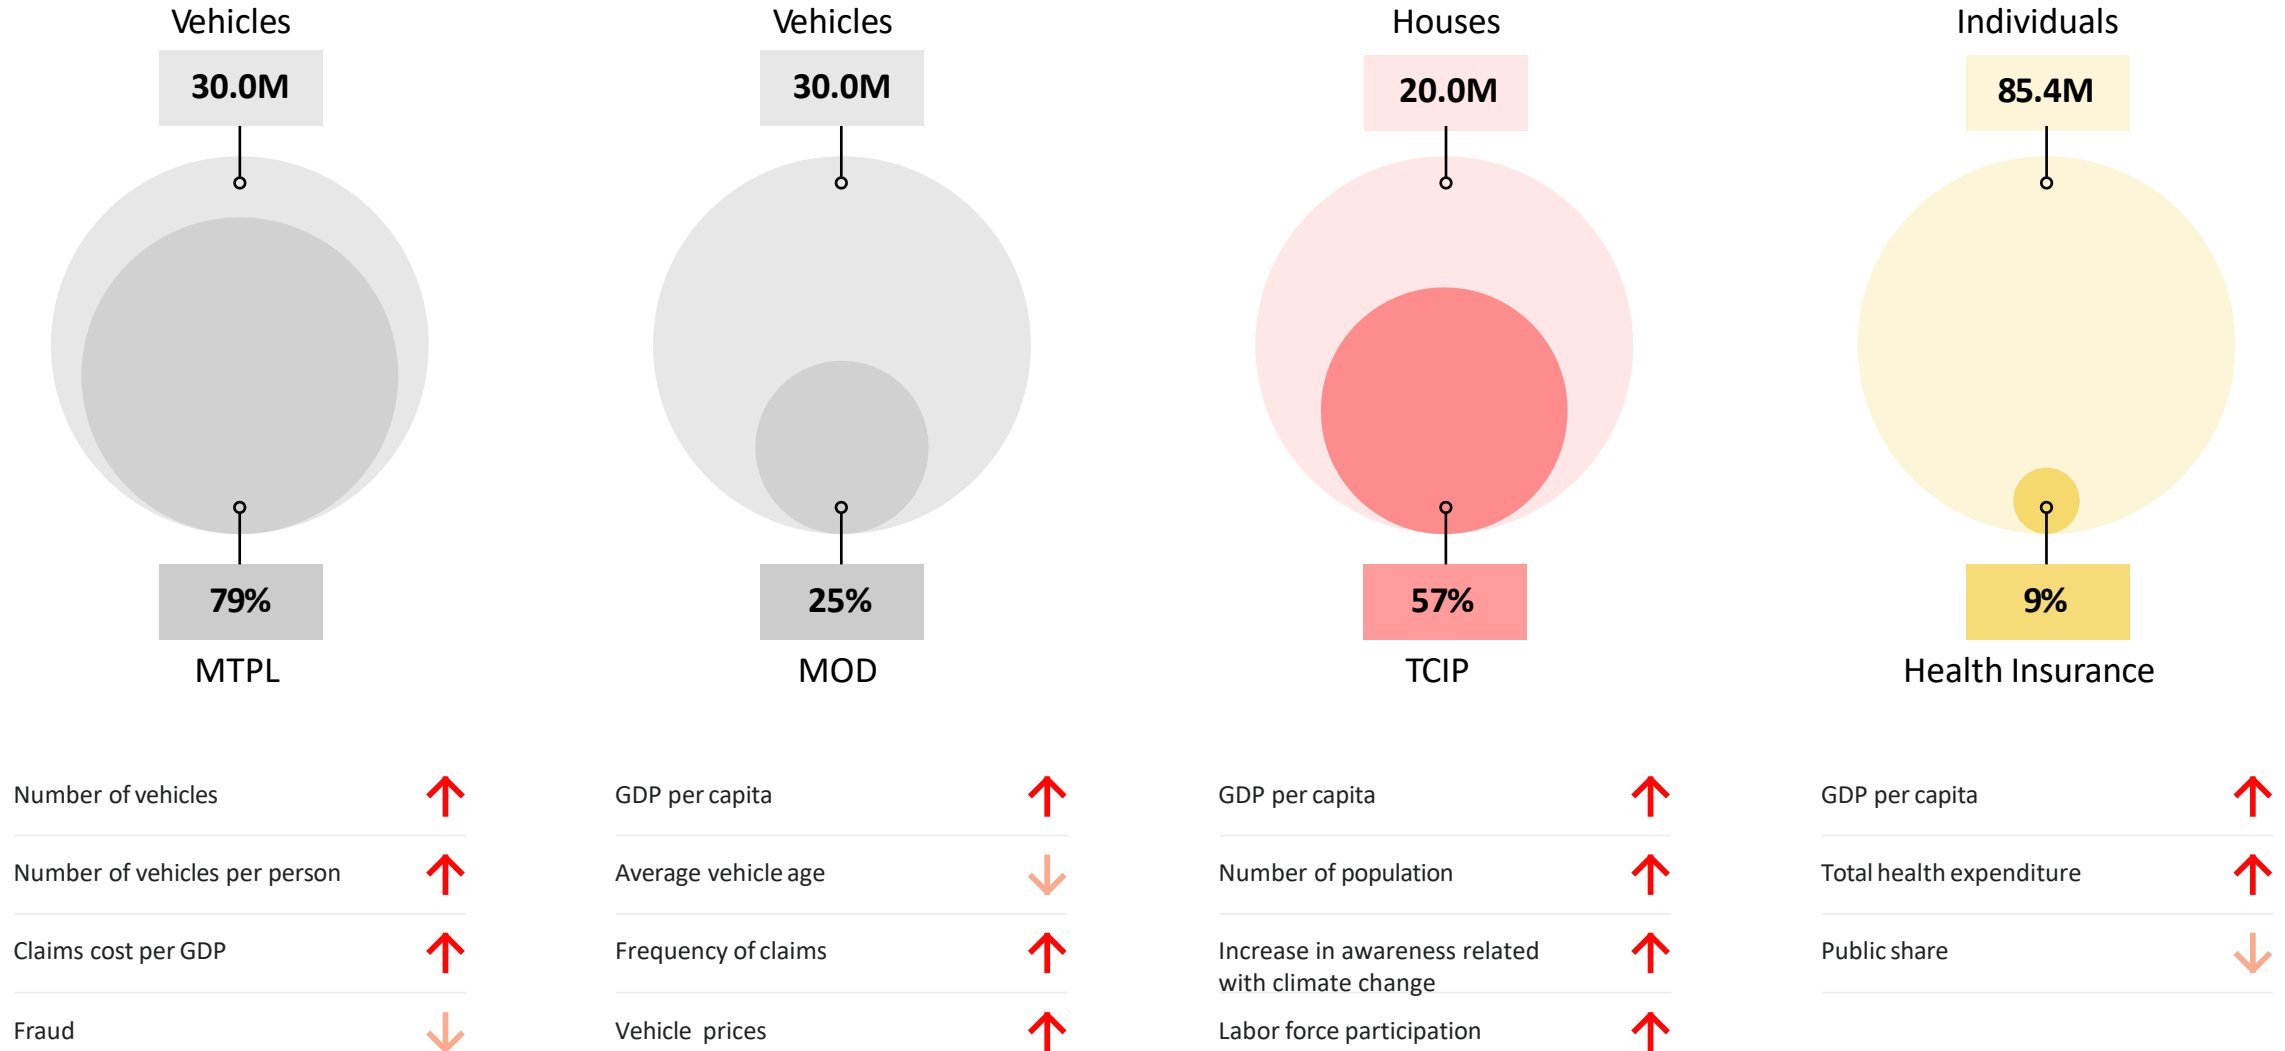

Future Outlook:

- Growth in the bank channel is anticipated to pivot towards the commercial and corporate segments.
